

Lesson Recap

In this lesson, you learned how to use Tableau with both **.xls** files and **.csv** files by analyzing:

- The **Movie** data.
- The **Asylum Seekers** data.
- The **World Cup** data.

You completed **three mini projects** with each dataset that required a strong understanding of worksheets, dashboards, and stories in Tableau.

Additionally, you learned how to put together:

- Tableau **Dashboards**
- Tableau **Stories**

You are now ready to **TAKE ON THE PROJECT!**

Though there is always more to learn with every tool, you are able to tackle tons of questions using Tableau! I cannot wait to see what you create for your projects.
